NEW 2014 COLLECTION

OREGON

DID YOU KNOW?
Arm and hand injuries accounted for 40% of the nearly 31,000 chain saw injuries in the U.S. in 2010, followed by leg injuries (38%), head and face (8%) and feet (6%).

Jerde, Lyn. "Chain Saw Safety Starts with Knowledge." *Portage Daily Register. Wiscnews*, 01 Mar. 2012. Web. 27 Dec. 2013.

NEW

Our new full-wrap chain saw protective chaps offer added ankle protection at a great value.

- UL approved
- Full wrap at calf
- Available in lengths of 32", 36" and 40", all with adjustable waistbands
- Available in high visibility orange
- Machine washable

Chain saw injuries occur most often to the hands, so using gloves constructed specifically for chain saw users is critical. These highly visible gloves feature smooth leather, reinforced palm, and close-fit wrist design.

At just under an ounce, these extremely light-weight glasses make them easy to wear all day, every day. By reducing pressure with elastic temples and slippage with a "fingertip" nose piece, these safety glasses are a contender for the most comfortable and stylish on the market.

NEW

Constructed from high-impact ABS, the new Oregon® helmet features integrated earmuffs, improved easy-to-use "push-pull" size adjustment, and stainless steel mesh visor.

- 20 ventilation holes for optimum breathability
- Durable stainless mesh visor also includes an optional, removable chin and neck guard for added protection
- NRR = 24dB

All Oregon® PPE products are tested according to relevant ANSI standards for the U.S. Please check local regulations prior to purchase outside of the U.S.A.
